The company hiding inside the cash engine.

A working proposal, founder to founder.

WHAT ALREADY EXISTS

What you built.

The rare part is already here. I am not proposing that we replace it.

01

Product instinct

You see the category before most people understand it.

02

Customer trust

People ask you what to buy and act on your judgment.

03

Organic demand

The engine moves without a mature paid or lifecycle system.

04

100% ownership

You took the risk and kept control of the asset.

05

A working engine

This is operating demand—not a startup idea on a whiteboard.

Already too real to operate from screenshots.

These are your numbers. Activation exists to make them provable.

THE CEILING

The company is still held together by your hands.

That is not a criticism. It is what happens when demand grows faster than infrastructure.

FOUNDER LOAD	You personally label and pack hundreds of vials.
FREEDOM	You said you cannot take a travel day because orders must go out.
FINANCE	Your mom covers CFO work part-time; “net” is not yet one reconciled definition.
CREATOR CHANNEL	Connor manages relationships; roughly 3–5 affiliates are active.
DATA	Analytics are broken, so attribution and contribution are unclear.
CONTINUITY	Banking and payment interruptions compete with growth every week.

IF NOTHING CHANGES

The cash keeps coming. The company never arrives.

None of this says the engine stops selling. It says the engine stays fragile, opaque, and carried by you — at any size.

A cash engine ages. A company compounds.

WHAT STAYS TRUE		WHAT IT COSTS
Concentration 3–5 affiliates and word of mouth carry demand.	→	One relationship or algorithm change can reset the channel overnight.
Founder gravity Operational decisions still route through you.	→	Your calendar stays the ceiling — and the company is unsellable without you.
Financial opacity Analytics are broken; “net” is not one reconciled number.	→	Cash you cannot prove is cash you cannot borrow against, distribute, or sell.
Uncaptured demand Customers arrive on their own; nothing captures or re-engages them.	→	Every buyer who never returns is compounding you never see.
Volume chaos Each spike adds manual exceptions and improvisation.	→	Growth adds fragility faster than it adds enterprise value.

You own the engine.

I build the company around it.

YOU KEEP PRODUCT, SOURCING, INVENTORY, AND FULFILLMENT. I BUILD THE COMPANY AROUND THEM.

Truth & infrastructure.

01 Financial command center Orders → settlements → contribution → reserves → distributable cash.	02 Attribution & analytics rebuild Analytics stop being broken: one ledger for creators, links, codes, refunds, and true profit.	03 Payment continuity Documented processors, reserves, escalation, and truthful continuity plans.	04 Operating perimeter Counsel-defined products, channels, claims, stop rights, and migration gates.

The complete affiliate backend.

Recruit Sourced from OVO's creator network — not cold DMs and hope.	Onboard Contracts, tax, training, and approved claims before day one.	Content Briefs, approvals, and a versioned claims library.	Attribute Order-level tracking through refunds to settled cash.	Pay Transparent statements and on-time payouts after settlement.	Manage Cohorts, scorecards, coaching, and offboarding rules.	Lifecycle Email, SMS, referral, support signals, and measured repeat behavior.

EVERY STAGE INSTRUMENTED. EVERY CREATOR DOLLAR RECONCILED TO SETTLED PROFIT.

Leverage that compounds.

12 Your team, day one OVO's operators, editors, and talent staff deploy immediately. No six-month hiring ramp.	13 Managers, not just hires I install leaders who run teams — so growth never routes through you or me.	14 Organization & cadence Owners, scorecards, weekly cadence, recruiting, and training that survive any one person.
15 Founder media A real content machine that turns your expertise into compounding authority.	16 The creator ecosystem Miami councils, dinners, content weekends, and earned travel retreats. A room commission can't buy.	17 Controlled hyper-scale Cohorts of 25, not a public free-for-all. Systems and data decide when to open the throttle.

REPLACEMENT VALUE

The backend alone is a real engagement.

A \$30k–\$40k build if you bought only the systems. The role includes them — and the parts you cannot buy.

STANDALONE OPERATING BACKEND BUILD

\$30K–\$40K

System architecture, workflows, data model, portal logic, and implementation design.

INTEGRATED OPERATING PARTNERSHIP

NOT SOLD SEPARATELY.

The full seventeen-system install, plus OVO's team from day one, installed managers, the creator network, and the founder ecosystem — with accountability for the whole company layer.

A CRO runs revenue. This builds the company.

STEP 1 OF 3 · 30 DAYS

\$50,000 activation.

The first mile of the Operating Partner road. Not a consulting project.

01 · ACTIVATE

Operating Partner (Designate)

Paid sprint deploys Alex and the OVO pod for the first 30 days: data room, reconciliation, financial close, operating map, backend, attribution, organization design, and the 90-day plan. Read-only; no public title or custody.

02 · CLEAR

Verify the road

Economics reconciled, ownership confirmed, insurance reviewed, and an independent counsel-defined operating perimeter both parties can follow.

03 · OPERATE

Operating Partner, Growth & Scale

Guaranteed cash, earned equity, and measured upside begin. The sprint becomes Day 1 of the operating mandate.

AFTER ACTIVATION CLEARS

Operating Partner, Growth & Scale.

GUARANTEED CASH <i>\$30k</i>_{/mo} Personal compensation for the operating mandate. Begins Day 31 — the \$50k activation covers the first 30 days.	EARNED OWNERSHIP <i>10%</i> 2.5% at closing · 2.5% at day-90 systems milestone · 5% over 24 months.	MEASURED UPSIDE <i>15%</i> Of incremental Collected Contribution Profit above the locked baseline.
FUNDED SEPARATELY · EVERY DOLLAR NAMED Managed OVO team deployment \$20k/mo from Day 31 — the activation covers the first 30 days · Software & extraordinary contractors company-funded · Full retreats & content weekends: hard costs prefunded + operating fee of the greater of \$25k or 20% of approved hard-cost budget		

PERFORMANCE SHARE · MONTHLY PAYMENT · 24-MONTH TERM · BEFORE DISCRETIONARY REINVESTMENT

YOUR VERIFIED PRE-DEAL ENGINE IS NEVER IN THE PERFORMANCE POOL. COVERED CHANNELS MUST SIT INSIDE THE APPROVED OPERATING PERIMETER.

CHOOSE WHAT YOU ARE BUYING

Two lanes. One decision.

LANE 01 · FULL MANDATE

Operating Partner, Growth & Scale

The company-building machine. I own financial truth, systems, team architecture, managers who run teams, the complete affiliate backend, lifecycle and retention, founder media, the creator ecosystem, travel and retreats, management cadence, and controlled hyper-scale. You keep product, sourcing, vendors, inventory, fulfillment, shipping, and the 3PL.

CASH-RISK HYBRID

\$30k / month · 10% earned equity · 15% incremental CCP · 24 months

OWNERSHIP-HEAVY

\$30k / month · Earn-in to 25% fully diluted equity · Mandatory monthly distributions of defined Available Cash · No performance share

Full 25% grant approved and issued at signing under reverse vesting · 10% signing · 5% Day 30 · 5% Day 90 · final 5% through Month 6.

Either package carries the same separately funded machine from Day 31 — \$20k/mo OVO team deployment; events prefunded plus a stated operating fee.

LANE 02 · INTRODUCTIONS ONLY

Creator Introduction Partner

Access to the relationships, nothing else. I introduce creators; Biologix owns vetting, contracting, onboarding, management, content approvals, attribution, payout operations, lifecycle, support, and events. No backend build, no OVO team, no retreats or travel, no management cadence, no equity, no operating title.

REVENUE SHARE

15% of Attributed Net Collected Revenue

Collected sales attributed to accepted creators Alex introduces, net of refunds and chargebacks — a revenue share, not profit and not all revenue. 24-month term; attribution window set in the definitive documents.

THE DECISION

Do you want access to my relationships — or the company-building machine behind them?

Clear enough to protect the relationship.

BRADEN RETAINS	ALEX / OVO HOLDS	BIOLOGIX OWNS
Overwhelming majority ownership	Earned equity under the chosen package	Customer, order, and product data
The verified pre-deal baseline	The Growth & Scale operating mandate	Its brand, catalog, and company accounts
Founder vision and public role	OVO's team, contractor relationships, and delivery management	Company-specific operating records
Product, category, sourcing, and suppliers	OVO's pre-existing network, systems, and generalized IP	Paid bespoke work product under the definitive IP schedule
Inventory, fulfillment, shipping, and the 3PL	Data, information, audit, distribution, pro-rata, and tag rights	Company-specific accounts, licenses, and tools it funds
Major sale and capital decisions	Successor and anti-circumvention protection	
NEVER ALEX'S CUSTODY OR AUTHORITY	Customer funds · Inventory · Sourcing & suppliers · Fulfillment, shipping & 3PL · Manufacturing · Product release · Prescribing · Medical advice	

THE NEXT MOVE

Start with the truth.

The first 30 days of the Operating Partner road: a paid activation and data-access session. If the engine is what you believe it is, Day 1 starts now.

THIS WEEK
